SUMMARY

BS Information Technology graduate (2026) specializing in full-stack development and AI/ML integration. Built production systems with Next.js, FastAPI, and React Native across mobile, web, and cloud. Seeking an entry-level Software Engineer role to ship reliable, scalable software in a high-impact team.

TECHNICAL SKILLS

Front-End: React, React Native, Flutter, Next.js, Figma, WordPress

Back-End: Node.js, FastAPI, Flask, PostgreSQL, Redis, GraphQL, Prisma

Cloud & Infra: Google Cloud, Docker, Microsoft Azure, Render, Vercel

AI/ML: PyTorch, TensorFlow, Roboflow, PGVector, RAG, YOLO, Mask R-CNN

CI/CD & Testing: Git, GitHub Actions, Jest, Playwright, React Testing Library

Languages: TypeScript, JavaScript, Python, Java, C++, C#, Dart, SQL

EDUCATION

Bachelor of Science in Information Technology

August 2022 – June 2026

West Visayas State University

PROFESSIONAL EXPERIENCE

Software Engineer Intern | INNO Digital Marketing Services

January 2026 - April 2026

BebeCare | *React Native, Expo, Supabase, Google Maps API, PayMongo*

- Co-built an MVP nanny booking platform in an Agile team environment, implementing real-time location tracking and payments, supporting early-stage user testing alongside an admin dashboard.

Event Management Web System | *Next.js, Supabase, JWT*

- Built a QR-based check-in system with RBAC, bulk guest import, and real-time attendance tracking, achieving sub-2-second scan verification while securing ticket integrity via JWT-signed tokens and PostgreSQL row-level locking to prevent duplicate scans across concurrent devices.

Software Engineer - Grand Canyon Multi Holdings Inc.

April 2026 - June 2026

NPS Survey & Analytics System | *Next.js, TypeScript, Mailchimp, Supabase*

- Built a multi-channel (email & SMS) survey platform for 15+ branches with real-time analytics dashboard, RBAC, RLS policies, passkey auth, and PDF export.

PROJECTS

InsureVis: AI Damage Assessment | *Flutter, Node.js, Flask, PyTorch, GCP*

October 2024 – April 2026

- End-to-end insurance claims platform integrating AI damage detection (75%+ accuracy) with offline-first mobile, automated report generation, and RBAC across three user roles.

verifAI (In Development) | *FastAPI, Next.js, Expo, GCP, Turborepo*

May 2026 - Present

- Distributed fact-checking platform: FastAPI ingests claims, async scrapers gather data, Gemini AI analyzes verdicts, and results stream to Next.js and Expo clients.
- Structured as a Turborepo monorepo with shared schema packages across the API and both frontends; planned for deployment on GCP Cloud Run.
